Endnotes for Data Matrix for Technical Abamectin II

-
- ¹ **830.1550, 830.1600, 830.1620, 830.1670, 830.1700, 830.1750, 830.1800** - The production process report MRID 47436201 was submitted by the original data submitter and owner, Abamax Chemical LLC, and was used to support the registration of Abamectin Technical (EPA Reg. No. 85317-1). The data and registration were transferred on October 13, 2009 to the manufacturer, Hebei Veyong Bio Chemical Co., Ltd. That technical registration of Abamectin Technical (EPA Reg. No. 84456-1) was voluntarily cancelled June 15, 2011 by the registrant. Hebei Veyong Bio Chemical Co., Ltd has given authorization to Zhejiang Tide CropScience Co. Ltd. to rely upon Hebei Veyong's previously-submitted data to support the registration of Technical Abamectin II. Hebei Veyong has certified that the manufacturing process has not changed since the original description of the process was documented in MRID 47436201.
- ² **830.1650** - Per OPPTS 830.1000, these data are not required for the registration of a technical product. See 830.1620 for production process information.
- ³ **830.6313** - Zhejiang Tide CropScience Co. Ltd. will not be packaging Technical Abamectin in metal containers, nor is Abamectin expected to come into contact with metals or metal ions during its storage. Therefore, Zhejiang Tide seeks a waiver from the stability to metal and metal ions portion of this data requirement for Technical Abamectin II. Data for stability to elevated temperatures were submitted for Zhejiang Tide CropScience's Technical Abamectin (EPA Reg. No. 80697-5) and those data are being cited to support Technical Abamectin II stability data (MRID 47086804).
- ⁴ **830.6314** - Zhejiang Tide seeks a waiver from the oxidation/reduction study because Technical Abamectin II does not contain any material that can be considered an oxidizing or reducing agent.
- ⁵ **830.6315** - Zhejiang Tide seeks a waiver from conducting the flammability study with Technical Abamectin II because it is a solid and does not contain any material that can be considered to be flammable.
- ⁶ **830.6316** - Zhejiang Tide seeks a waiver from this data requirement because Abamectin does not contain the chemical bonds or functional groups associated with explosive chemicals.
- ⁷ **830.6317, 830.6320** - Per PR Notice 92-5, storage stability and corrosion characteristics data are not required to be submitted unless specifically requested by the Agency. Zhejiang Tide agrees to conduct these studies if required and requests that the studies be made a condition of registration.
- ⁸ **830.6319, 830.6321, 830.7100, 830.7220, 830.7520** - Miscibility data are not applicable because Technical Abamectin II is not an emulsifiable liquid. Dielectric breakdown voltage is not applicable because Technical Abamectin is a technical grade material and not an end-use product. Viscosity data are not applicable to Technical Abamectin II because it is a solid. Boiling point data are not applicable to solids (refer to melting point data). Particle size, fiber length and diameter distribution is not applicable to Technical Abamectin II because it is not a water-insoluble or fibrous material.
- ⁹ **830.7370** - Zhejiang Tide seeks a waiver from this data requirement because Abamectin does not contain any functional group that would dissociate.
